Collection

True stones

È un'immensa passione a guidarci nell'incontro con l'unicità della natura. La varietà delle pietre naturali è pressoché illimitata, caratteristica che ne riflette le più differenti storie e origini. I componenti più diversi, esposti per milioni di anni all'azione degli elementi, rendono unico ogni singolo pezzo di pietra naturale. La passione per questo nobile materiale ci spinge a cogliere e ad esaltare la meraviglia della natura, per renderla accessibile a tutti. La ricerca continua ci consente di ampliare costantemente la gamma di prodotti offerti. Con più di 800 varietà di pietre naturali siamo in grado di suggerire per ogni progetto il materiale ideale, che sia capace di soddisfare ogni necessità tecnica e richiesta di stile.

Mit großer Leidenschaft tauchen wir ein in die Einzigartigkeit der Natur. Die Vielfalt des Natursteins ist nahezu grenzenlos und spiegelt seine unterschiedliche Entstehungsgeschichte wider. Verschiedenste Komponenten, Millionen von Jahren den Elementen ausgesetzt, machen aus jedem Stück Naturstein ein Unikat. Durch unsere Liebe zu diesem edlen Material, haben wir es uns zur Aufgabe gemacht, den Schatz der Natur sichtbar und für jeden zugänglich zu machen. Die unermüdliche Suche nach neuen Materialien erweitert unser Produktsortiment stetig. Mit über 800 Natursteinarten können wir für jedes Projekt den idealen Stein anbieten, welcher die technischen Voraussetzungen erfüllt und keinen stilistischen Wunsch offen lässt.

It is with great passion that we dive into the uniqueness of nature. The great variety of natural stone is virtually unlimited, and that reflects the different histories of origin. The most varied of components, subjected to the elements over millions of years, turn every piece of natural stone into something completely unique. As a result of our love for this noble material, we have made it our quest to turn this treasure of nature into something visible and accessible to all. The continuous search for new materials constantly extends our product range. With more than eight hundred types of natural stone, we can approach each project by working with the ideal stone that both meets the technical requirements and satisfies the stylistic desires.
