# Kitchen Selection

Natures best in the kitchen

## KITCHEN SELECTION

Natural stone is the perfect material for kitchen worktops. Its unique beauty and variety makes it a timeless piece of art created by nature, extraordinarily resistant and durable.

The Bagnara Kitchen Selection includes a wide range of carefully selected natural stones that meet all the special requirements of a kitchen workplace and allow unlimited possibilities for personalisation.

## Kuroca

*Natural and Beautiful*

Its veined structure distinguishes this black quartzite from Angola. An Extremely Hard stone and resistant to acids, it is a natural elegance to environments.

## Azul Aran®

*Refreshing and Exclusive*

Azul Aran® Spanish granite gives a refreshing and exclusive effect to your kitchen thanks to its blue-grey feldspars and white shades. Its structure is unique in the world.

## BAGNARA TRUE STONES

**True Stones** stands for our company's passion for natural stone, a huge variety of more than 900 natural stones, and our grown experience and professional competence from the quarry all the way to your top quality finished product.

## Vitoria Regia

*Unique and Original*

This green Brazilian quartzite is stunningly unique with its rich green and gray tones with tonal veins and highlights throughout. The organic beauty of this natural stone makes it ideal for countertops that allow the sweeping beauty to shine.

#### UNIQUE AND VERSATILE

Every natural stone is an inimitable and unique work of art provided by nature; for its colour, structure and veining. The combination of this natural variety with the most diverse surface finishes makes each worktop an expression of the personal touch and style of the person who commissioned it.

## Carbon Grey

*Contemporary and Unobtrusive*

The finely veined structure of this quartzite is what gives it a special charm and unparalleled elegance. This natural stone fits perfectly in any modern and contemporary projects in the kitchen area.

## Alps Glitter

*Premium and Rustic*

This grey-brown South Tyrolean mica schist is characterized by different inclusions of deep red garnet and distinct white quartz veins, which give brilliance and a particularly noble touch to each application.

## Bethel White

*Gentle and Calming*

It is probably the whitest granite on the market. A very hard stone, it is distinguished by its uniform structure and its high resistance to acids, which is particularly useful in the kitchen.

## FLEXIBLE AND DURABLE

Natural stone is shapeless, completely adaptable (it is not a standardised mass product) and is therefore available in almost all sizes, thicknesses and shapes. This wonderful advantage is even more evident when stone is combined with materials such as metal, wood and glass. Thanks to its durability, natural stone looks new even after years.

This wonderful advantage is even more evident when stone is combined with materials such as metal, wood and glass. Thanks to its durability, natural stone looks new even after years.

## Silver Cloud

*Timeless and Versatile*

As the name suggests, this American granite resembles a silver cloud. The light shade and silver-grey veins give the material a stimulating and timeless look.

#### NATURALLY HEALTHY

Stone is a product of nature which, unlike artificial stones, is not the result of an industrial process which, through a high energy input, assembles different raw materials, resins and chemicals. Free of harmful substances, natural stones are optimal for all food sectors, without any problems.

## American Black

*Natural and Elegant*

This black granite from the U.S. is characterized by its particularly high scratch and acid resistance. Its slightly cloudy structure gives every kitchen top a naturally elegant and refined look.

## Mystic Grey

*Wild and Mysterious*

This anthracite-coloured granite from Brazil embellishes modern environments with its uniform and homogeneous weave and its elegant lighter shades.

# Pannonia Grün

*Rustic and Modern*

Green chlorite slate from Austria is really special. The characteristic light green and white veins give this natural stone a special freshness.

## SUSTAINABLE AND SAVES RESOURCES

Thanks to modern technology, the extraction and processing of natural stone is becoming increasingly sustainable. Any processing waste is reused, e.g. for gardening along many others. According to various scientific studies, the potential contribution to global warming (GWP) of a natural stone work surface is about 74% lower than that of ceramics.

## Brown Silk

*Cosy and Modern*

Brown Silk is a Brazilian quartzite with an elegant brown background, uniform and characterized by fascinating veins. Its particular texture is reminiscent of shiny brown silk and appears cosy, modern and homely at the same time.

All materials are carefully selected and, thanks to their excellent technical properties, they are by nature well prepared for the daily demands of a kitchen countertop.

#### HEAT RESISTANCE

hot pots and pans can be placed directly on the kitchen worktop

#### WATER RESISTANCE

extremely low absorption of liquids

#### SCRATCH RESISTANCE

particularly resistant and insensitive to scratches and traces of everyday use

#### EASY CARE

no regular cleaning required

#### UV RESISTANCE

natural stone and its colours do not suffer and fade when exposed to sunlight

## Black Pepper

*Fresh and Smart*

The black granite of Turkey is very uniform and constant in colour. Thanks to its fine and evenly distributed grain, Black Pepper has an unmistakable structure. Its character is fresh, modern and elegant.

## Domus White

*Stylish and Versatile*

This white quartzite from Brazil has a characteristic veined structure. Extremely durable and relatively easy to clean, this natural stone provides simplicity, class, elegance, and goes amazingly well with any kitchen cabinet colors and designs.

NEW 2021

Black Tempest  
*Elegant and Modern*

This black quartzite from Brazil captivates with its fascinating veining and shimmering texture, which dresses any room with elegance and inimitable uniqueness.

## Colonial Black

*Timeless and Sophisticated*

A glance into the deep black of the night, this is the timeless elegance of this southamerican granite that can be integrated into almost any room.

## Atlantic Stone

Hard and Natural

This Chinese vulcanite is unmistakable. The bluish-grey base tone, which can vary in intensity and grain, is perfect for elegantly embellishing modern environments.

## TIPS AND TRICKS

Hard stones like granite, gneiss, porphyry, gabbro and quartzite, sometimes show quartz veins, small pores, subtle fissures and color differences, which are not defects, but are an unmistakable sign of the natural origin and uniqueness of natural stone.

Thanks to its natural porosity, each natural stone becomes richer in contrasts over the years. Polished surfaces are easier to clean due to their smoothness than mat surfaces such as satin, flamed and brushed.

### IMPREGNATION

We recommend treating our materials with an oily, water-repellent impregnation. We have had the best experience with the product „Lithofin Fleckstop W“. If the impregnation effect should decrease over the years, the surface can simply be re-impregnated.

### DAILY CARE

Hard stones are practically indestructible and require minimal care and attention. For daily cleaning, simply clean the worktop with warm water and a microfibre cloth. Hot water is the best grease solvent. Heavy dirt, oil and grease splashes are removed as quickly.

### RECOMMENDATIONS

Your natural stone slab can easily withstand high temperatures. However, it is not recommended you put a hot pot directly from the stove onto the stone. Reason is that sometimes there is oil or grease on the underside of the pot. These can easily penetrate into the stone when it is hot.

# BAGNARA STONE CARE

The natural stones in the Bagnara Kitchen Selection have all been selected to resist household acids and scratches. In order to maintain the beauty of your kitchen countertop over time, we advise against the use of highly acidic, alkaline or vinegar and lemon based cleaners, and advise against cutting fruit directly on the kitchen countertop.

## BAGNARA STONE CARE

For the daily cleaning of your worktop it is sufficient to use a cloth and water.

In order to maintain the shine and beauty of your worktop, we recommend cleaning the surface occasionally with the products of the „Bagnara StoneCare Set“.

If necessary, you can order this care set.

You can find Bagnara Stone Care products in your local kitchens or directly at [info@bagnara.net](mailto:info@bagnara.net).
